PRODUCT DESCRIPTION

Designer: Tom Chung

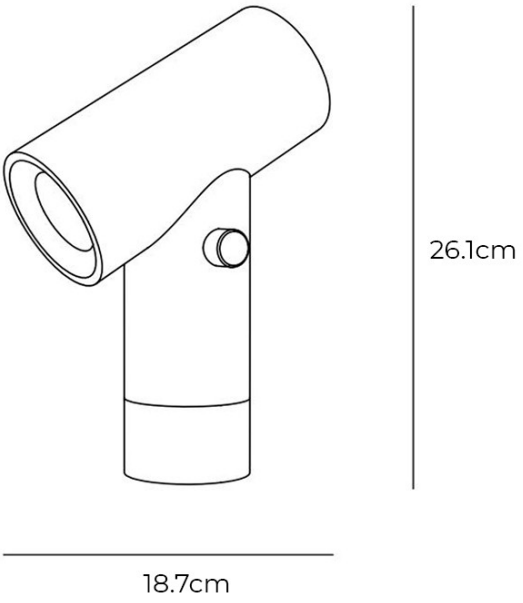

Muuto Beam LED Portable Lamp

The Muuto Beam Portable Lamp is a cordless evolution of the original Table Lamp, offering the same compact form, intriguing light output and refined expression but with added flexibility. Designed by Tom Chung, the Beam Portable provides high-quality directional lighting that can be easily controlled via an integrated dial dimmer on the base of the lamp. This dimmer allows you to choose between three different dimmer settings, while the unique cylindrical design emits light from both ends.

The portability of the Muuto Beam makes it perfect for tables, cabinets or shelves, providing direct light or an ambient glow. With an IP56 rating, it's also suitable for outdoor use. Designed for longevity, the lamp is crafted from anodised aluminium and features a user-replaceable light source. Compact and versatile, it functions as an accent light, an atmospheric detail, or a sculptural object. The Muuto Beam LED Portable Lamp is also available in two sleek finishes, allowing you to choose between either a minimalistic black or a more striking aluminium.

PRODUCT SPECIFICATION
