PRODUCT DESCRIPTION

Designer: Tom Dixon

Tom Dixon Jack LED Outdoor Portable Lamp

Tom Dixon Jack is a portable LED lamp designed around freedom of placement, both a light and seating, you can move it wherever it is needed without being tethered to a socket. Its tetrapod silhouette is inspired by concrete coastal defences, giving it a sculptural presence that works as an object in its own right, with a matte white finish that suits both contemporary and more minimal outdoor settings.

Made for indoor and outdoor use with an IP65 rating, Jack provides a soft, diffused glow and is rechargeable for cable-free lighting. A button dimmer is integrated on the product for adjustable brightness, and a remote option allows multiple Jack lamps to be paired for shared control. It works well on terraces, in gardens, by entrances, or as flexible lighting for hospitality, events, and informal seating areas where portability and durability matter.
