HAY Host LED Portable Lamp

The HAY Host LED Portable Lamp is designed to deliver light with minimal visual noise. Its slim silhouette takes up very little space, while the downward cast creates a soft, contained pool of light on the surface below, making it a strong choice for relaxed table lighting in living spaces, bedrooms, terraces and hospitality settings. With two heights available, Host 220 and Host 300, it is easy to choose a lower profile option for tighter surfaces or a taller version when you want a little more presence and reach.

Host is cordless and rechargeable via USB-C, with an IP44 rating for indoor and outdoor use. A built-in magnet in the base allows it to attach directly to metal surfaces, while the included flat steel base enables stable placement on non-magnetic materials such as wood, stone or ceramic. The touch step dimmer gives straightforward control over brightness, and the portable format makes it useful for shared tables, shelves and quiet corners where fixed wiring is not practical.

PRODUCT SPECIFICATION

Light Source: 2W, 2700K, 113 Lumens

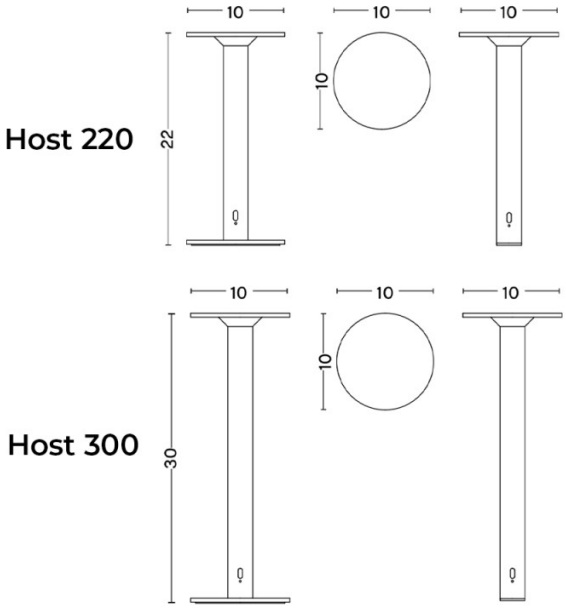

IP Code: 44

Dimming: Integrated dimmer on the product.
