PRODUCT DESCRIPTION

Designer: Ramos & Bassols

Vibia Duo Petra Dome Angled LED Ceiling Light

Vibia Duo Petra Dome Angled LED Ceiling Light gives interiors a timeless and elegant presence, distinguished from the wider Vibia Duo range by its interior slate lining. Designed by Ramos and Bassols, it combines a bold metallic exterior with a natural inner texture, using a simple geometric form to produce a direct but diffused illumination.

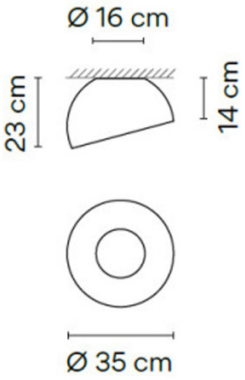

Because the dome is angled, the light falls into the room differently from a standard ceiling fitting. It is a bit more directed, but still soft in use. That slight shift makes it useful where a pendant would be awkward, and where a flat ceiling light can feel a little too fixed or plain.

Vibia Duo Petra Dome Angled LED Ceiling Light is available in White, Graphite, and Cream. Among the three versions, this is the option with the most directional character, while still keeping the same material contrast and restrained appearance. Best suited for bedrooms, corridors, living areas, and other interiors with lower ceilings where a softer, angled glow is preferred.

Please note, this product is also available in a larger Ø70cm version. Contact us for pricing and information.
