PRODUCT DESCRIPTION

Designer: Konstantin Grcic

Flos Nocturne LED Wall / Ceiling Light

We currently have limited stock of this item in our Clearance section.

Flos Nocturne LED Wall / Ceiling Light is a modular wall lamp designed by Konstantin Grcic, extending horizontally into the space with a contrast between extra-clear borosilicate glass and aluminium technical components. The collection is an evolution of the Noctambule family, reprising blown glass and advanced LED technology while introducing a more modular approach to lighting design.

The Cone model is the more directional option, with a conical extra-clear borosilicate glass diffuser, focused optic, and a light unit that swivels on two axes. The Bowl model uses a hemispherical diffuser, producing diffused and ambient light with a ceiling-wash effect. Both versions use the same extruded aluminium arm and rectangular wall fixing plate, with the die-cast aluminium Light Engine housed within the lamp junctions.

Available in Black or Silver, the Flos Nocturne LED Wall / Ceiling Light is defined by the visual contrast between the ethereal refinement of glass and the industrial expression of its technical components. The Cone light unit swivels on two axes, adding further control where focused light is required. Best suited for living rooms, bedrooms, hallways, and reading areas where wall-mounted direct or diffused ambient light is needed.

PRODUCT SPECIFICATION

Light Source: **Cone:** 12W, 2700K, 545 Lumens
Bowl: 12W, 2700K, 514 Lumens

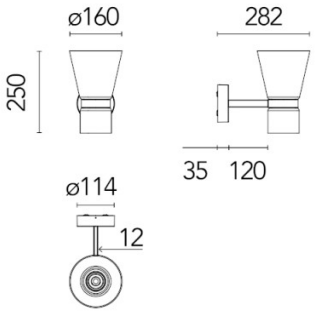

IP Code: 20

Dimming: Dimmable via mains phase dimming.

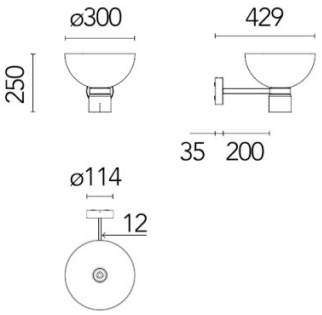

Dimensions: **Cone:**
Height: 25cm
Width: 16cm
Depth: 28.2cm

Bowl:
Height: 25cm
Width: 30cm
Depth: 42.9cm

Cone

Bowl
