PRODUCT DESCRIPTION

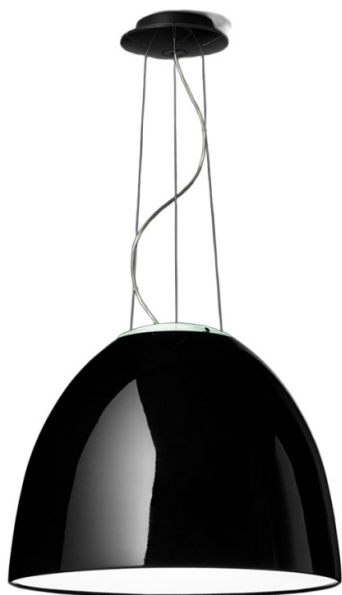

Designer: Ernesto Gismondi

Artemide Nur Gloss LED Pendant Light

Artemide Nur Gloss LED Pendant Light applies a perfectly smooth and polished finish to the Nur body, while keeping the light controlled within the shade rather than exposed below it. Designed by Ernesto Gismondi, it provides general ambient lighting through direct and indirect emission, and the standard Nur Gloss LED versions are Artemide App Compatible.

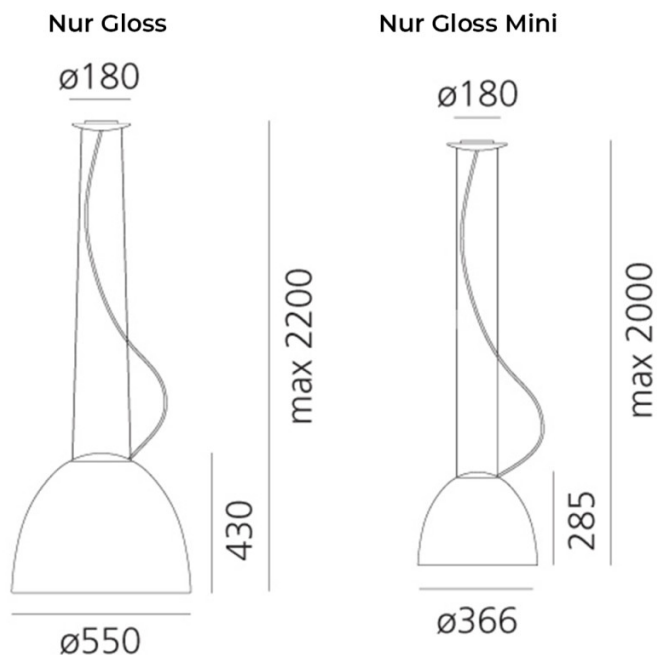

This page brings together Nur Gloss LED and Nur Mini Gloss LED. Both are encased in a diffuser at the bottom, which changes the lower edge slightly when seen from below. The larger fitting has more pull over a table or open area, while the Mini keeps the same idea in a smaller suspension.

Artemide Nur Gloss LED Pendant Light is available in White and Black, in standard and Mini sizes. In use, the gloss finish is what you notice first. Best suited for dining tables, kitchen islands, living spaces, and hospitality interiors where an integrated LED pendant is needed for general ambient light with a smoother, more polished surface.
