PRODUCT DESCRIPTION

Designer: Jasper Morrison

Flos Oplight LED Wall Light

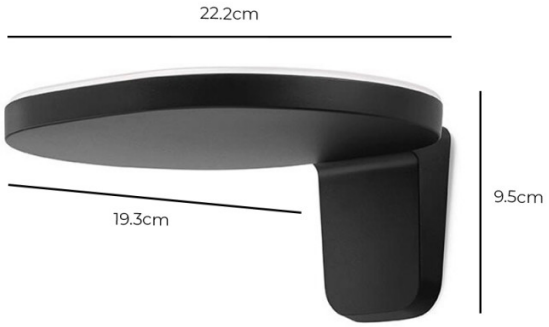

EX-DISPLAY, BOXED IN A-GRADE ORIGINAL PACKAGING. SIGNS OF WEAR AND TEAR TO THE BODY. SEE IMAGES FOR EXACT CONDITION.
1 x White Available.

The Flos Oplight Wall Light was designed by Jasper Morrison, who wanted to make a light that was simple and makes a good atmosphere without being obtrusive or even noticeable. This sustainable piece of design is fully recyclable, from the material used to the packaging it is in. The Oplight design proves that technologically advanced products can be made with respect for the environment. The lack of glue in the construction of this sustainable wall light allows you to take part, replace or recycle the Oplight with ease. Every last detail of this light is made as environmentally friendly as possible, from the easy-to-recycle die-cast aluminium to the solvent-free paint, and even the production methods are considered in the overall environmental impact.

The light source is housed within the flattened head of the lamp and is made of a board of LEDs, which are covered with a clear panel that directs the light out and away from the wall. This LED panel emits a large amount of light compared to the power consumed, with a lifetime of more than 50,000 hours. This energy-efficient LED light source can also be easily replaced without having to replace the whole wall light.
