Vibia Asia LED Floor Lamp

Vibia Asia LED Floor Lamp carries the pitched-roof form of the Asia collection into a freestanding lamp for lower, more intimate lighting. The lacquered glass shade filters the light with a soft, translucent quality, while the adjustable diffuser allows the light to be directed towards a chair, sofa, or reading area.

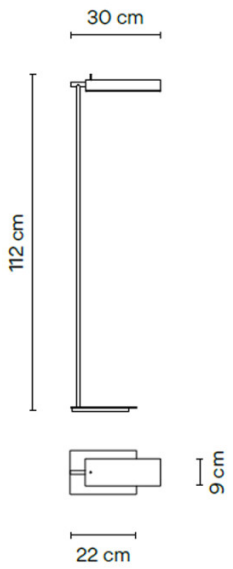

Vibia Asia LED Floor Lamp brings the collection's lacquered glass shade down to seating height, making it feel more like a reading lamp than a general room light. The shade can be adjusted towards a chair, sofa, or bedside area, so the light falls where it is needed rather than filling the whole room from above. Its Volumetric Diffuser gives a soft, directed glow on the surface below, useful for reading, evening light, or adding a warmer pool of light beside furniture.

The 2700K LED output keeps the light warm, with dimming capability. Available in Black, Warm White, and Beige finishes, the Asia Floor Lamp has a simple architectural form that works well beside soft seating, in bedrooms, or in hospitality spaces where a more focused floor light is needed. Most suited to living rooms, reading areas, bedrooms, lounge seating, and hotel spaces.

Please note, this product is also available with Casambi dimming compatibility. Contact us for pricing and information.
