PRODUCT DESCRIPTION

Designer: Antoni Arola

Vibia Asia LED Suspension Light

Vibia Asia LED Table Lamp combines precision and serenity in a compact format with an adjustable shade and lacquered glass diffuser. Its pitched-roof form gives the lamp a clear architectural profile, while the glass softens the light for close use.

The 3635 creates a warm focal point on the work surface, where the lacquered glass filters the light with the delicacy of rice paper. The 3637 uses a double diffusing shade that evokes classic library lamps, reinterpreted with a contemporary expression.

Both versions use a 2700K LED source with a Volumetric Diffuser effect, producing close and even light for reading or focused tasks. Most suited to desks, bedside tables, reading areas, sideboards, and hotel rooms.
