PRODUCT DESCRIPTION

Designer: Tom Dixon

Tom Dixon Bell v2 LED Portable Lamp

The Tom Dixon Bell v2 LED Portable Lamp updates the existing Bell Portable with improved control and technical functionality while keeping the collection's familiar domed silhouette. Its polished surface takes on some of the colour and detail of the room around it, while the concealed diffuser softens the light below. The v2 version is available in Black, Fluoro Orange, Grey, Taupe, Moss, Baby Blue, Burgundy, Silver, Gold, and Copper.

Bell Portable v2 can be moved easily between rooms, from a bedside table or shelf to a dining table, sideboard, or low coffee table. The integrated light source can switch between 2700K and 3000K with a double-tap, allowing a warmer or slightly clearer tone depending on the setting. Continuous dimming is controlled by pressing and holding the button on the base, giving more gradual control than the previous 3-step dimming system.

The lamp includes a memory function, a 200cm USB-C to Magnetic charging cable, and a replaceable LED module and battery. Its IP44 rating makes it suitable for indoor and outdoor use, with Tom Dixon's guidance noting that it should be stored inside when not in use. Most suited to bedside tables, dining tables, sideboards, shelves, and flexible portable lighting around the home.

Please Note: Do not leave the Fluoro finish in direct sunlight for prolonged periods as this will lead to colour fading on the product.
