PRODUCT DESCRIPTION

Designer: Herzog & De Meuron

Artemide Boltons LED Table Lamp

Artemide Boltons LED Table Lamp uses an upward-facing optical system to produce adjustable reflected light. Designed by Herzog & de Meuron, it combines a transparent handcrafted glass body with a broad metal reflector in a Mirror finish, giving the lamp a strong horizontal shape while leaving its supporting structure visible.

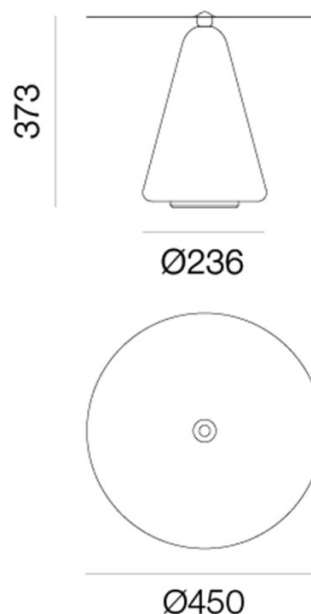

A lens at the base directs light upwards through the glass body and towards the upper reflector. The disc can be angled to control how the light is reflected across nearby surfaces, allowing the output to be adjusted to suit its position in the room. A delicate air bubble is formed within the glass using a traditional technique, becoming part of the structure and catching reflections as the light passes through.

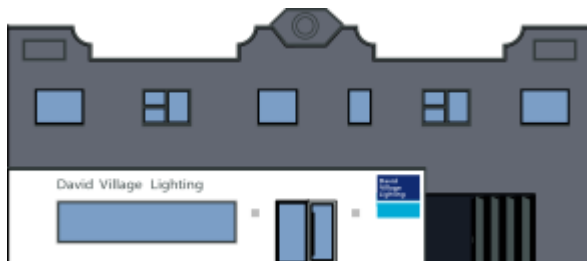

The reflector is secured by a precision-engineered magnetic sphere, giving it a wide range of movement without obstructing the optical system. Its integrated 2700K LED produces a warm light, suitable for use where a softer reflected output is preferred. Most suited to side tables, consoles, low cabinets, and living rooms where adjustable reflected light is needed from a prominent table lamp.

PRODUCT SPECIFICATION

Light Source: 13W, 2700K, 904 Lumens**IP Code:** 20**Dimming:** In-line dimmer included on cable.**Dimensions:** Height: 37.3cm
Shade: Ø45cm

Cable Length: 200cm
