PRODUCT DESCRIPTION

Designer: Joan Gaspar

Marset Fris LED Ceiling / Wall Light

The Fris Ceiling and Wall Light consists of an aluminium structure which houses a glass tube; within this tube is the integrated LED light source. What makes it unique is that the glass body not only protects the light, but also provides a mechanical function that allows the lamp to rotate and the light to be steered in a certain direction. Fris allows you to easily direct the LED illumination, meaning you can easily alternate between a direct or indirect glow. Through the transparent glass, we see the lamp's interior, which consists of two profiles: one includes the light source and the other acts as a parabola, projecting a crisp, intense light.

Designed by Joan Gaspar, the Marset Fris LED Ceiling and Wall Light is a striking linear lighting solution that is easily adjustable. It offers eye-catching design and inviting lighting for a variety of both residential and commercial interiors. Display this wall/ceiling light independently, in multiples and even alongside the matching suspension in the [Fris collection](#).

Please Note: The Marset Fris Ceiling/Wall Light is supplied with a surface canopy as standard. A recessed canopy is available but requires a remote driver. Fris is also available in Bronze and in two larger sizes. Please [Contact Us](#) for further information and pricing.

PRODUCT SPECIFICATION

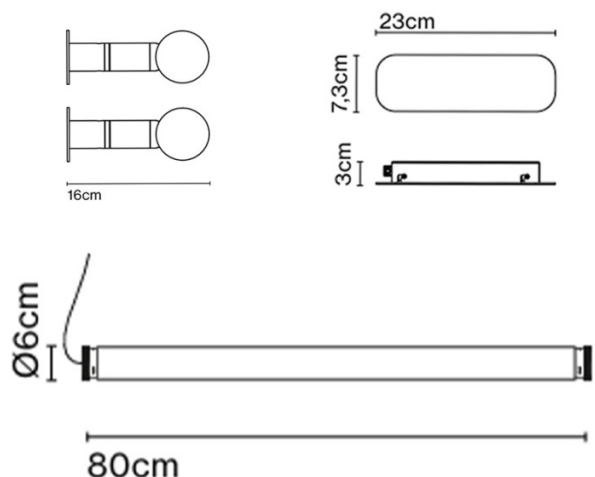

Light Source: 2700K: 13.7W, 2700K, 1657 Lumens
3000K: 13.7W, 3000K, 1612 Lumens
