PRODUCT DESCRIPTION

Designer: Simona Sbordone**Brokis Comet LED Pendant**

The Brokis Comet LED Pendant is an eye-catching luminaire that combines modern technology with the timeless beauty of handblown glass. Comet was designed by Simona Sbordone, who was inspired by the tail of a comet in the night sky, and is available in a variety of glass finishes and can be supplied in three different sizes and two different shapes: Comet Round and Comet Square. Each Comet is handblown from laminated glass, with grains of silica sand added between the layers to render a unique celestial effect that gently diffuses the light throughout the surrounding space.

The Comet Pendant can be used in a multitude of ways; each variation can be displayed individually for subtle illumination or configured in multiples for more dramatic installations. This makes the range incredibly adaptable and allows for use in both residential and commercial settings. These pendants are equipped with an efficient LED source and diffuser, ensuring both direct and indirect lighting and allowing them to be appropriate for a mixture of interiors.

Please Note: The Brokis Comet Pendant is supplied as non-dimmable as standard, but can also be provided with different dimming capabilities. Please [Contact Us](#) for further information and pricing.

PRODUCT SPECIFICATION
