Designed by Pierre Charpin, the HAY PC Portable Table Lamp is a sleek and versatile lighting solution that seamlessly blends form and function. As part of HAY's commitment to sustainability, this updated edition is crafted from 95% post-consumer recycled plastic, making it an environmentally conscious choice for both indoor and outdoor use. Retaining its signature minimalist silhouette, the lamp now comes in an expanded selection of mono-colours and duo-tone finishes, designed to complement other HAY furnishings and create a cohesive aesthetic in modern interiors.

This cordless luminaire offers complete portability, allowing you to take ambient lighting wherever it's needed. The USB-C charging port ensures faster and more convenient recharging, while a replaceable battery extends the lamp's lifespan, reducing waste and increasing sustainability. With a three-step dimming function, the PC Portable can adapt to any setting, from soft mood lighting to functional illumination, making it perfect for dining tables, workspaces, patios, and more. The translucent-shade emits a gentle, diffused glow, ideal for creating a warm and inviting atmosphere. Meanwhile, the opaque-shade options provide focused downlighting, enhancing usability in workspaces or outdoor settings.
