## Flos Nocturne S LED Pendant

Flos Nocturne S LED Pendant is part of Konstantin Grcic's Nocturne collection, introduced by Flos in 2026. The suspension lamps use transparent borosilicate glass with aluminium components that house the LED lighting. There are two glass shapes to choose from, a tapered Cone and a rounded Bowl, each producing a different spread of light. The fittings also illuminate the glass itself, giving the transparent shades a gentle glow when switched on.

The S1 Cone provides more concentrated downward lighting and would work well above a kitchen island, dining table, or reading area. The Bowl versions have a wider distribution of light, making them suitable for general lighting in dining rooms and living spaces. There are two Bowl sizes, with the larger S2 offering greater light output for more spacious interiors. Several pendants can also be arranged together, either at matching heights or with varied suspension lengths.

Nocturne S is available with Black or Silver aluminium components, both paired with clear glass. The combination of glass and exposed metal gives the collection an industrial character, although the transparent shades keep the fittings from appearing too heavy. All three versions have integrated warm-white LEDs and can be dimmed using a compatible external dimmer. The wider Nocturne collection includes matching wall and floor lamps.

## PRODUCT SPECIFICATION

**Light Source:** **S1 Cone:** 12W, 2700K, 545 Lumens
**S1 Bowl:** 12W, 2700K, 514 Lumens
**S2 Bowl:** 24W, 2700K, 1030 Lumens

**IP Code:** 20

**Dimming:** Dimmable via mains phase dimming.

**Dimensions:** **S1 Cone:**
Height: 25cm
Shade: Ø16cm

**S1 Bowl:**
Height: 25cm
Shade: Ø30cm

**S2 Bowl:**
Height: 39.5cm
Shade: Ø47.5cm

Cable Length: 300cm
