Vibia Class 2800 LED Outdoor Floor Lamp

Vibia Class 2800 LED Outdoor Floor Lamp is a fixed exterior light by Sebastian Herkner, inspired by the appearance of traditional lanterns and early 20th-century lampposts. A slender matt black aluminium stem supports an upright cylinder of fluted borosilicate glass, with the integrated LED concealed behind an inner opal diffuser. The glass softens the light and gives the illuminated cylinder a textured appearance, while the simple metal structure keeps the design relatively understated.

Class 2800 can be installed away from buildings, making it useful for paths through gardens or open courtyards where there may not be a suitable wall for lighting. The glass cylinder allows light to spread outwards, illuminating the area around the lamp rather than directing everything onto the ground. A single fitting could be placed near an entrance or garden seating area, while several could be installed along a longer path to provide more consistent lighting.

The Class 2800 is available in Black with a warm 2700K integrated LED and an IP65 rating for outdoor use. This version is dimmable via Bluetooth using the Casambi app, allowing the light level to be adjusted through a compatible wireless control system. The lamp is designed for fixed ground installation and uses a remote electrical connection, so the location of the driver and ground fixing should be considered before installation. The wider Class collection also includes matching outdoor wall lights. Most suited to garden paths, entrances, walkways, patios, terraces, courtyards, and exterior hospitality areas.

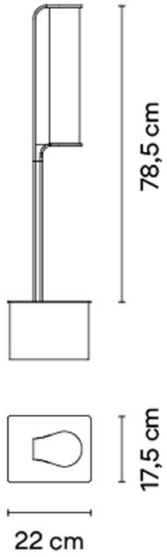

PRODUCT SPECIFICATION

Light Source: 3.5W, 2700K, 332 Lumens

IP Code: 65

Dimming: Dimmable via Bluetooth with the Casambi app.

Dimensions: Height: 78.5cm
Width: 22cm
Depth: 17.5cm
