PRODUCT DESCRIPTION

Designer: SkLO

SkLO Balance 1.0 Pendant

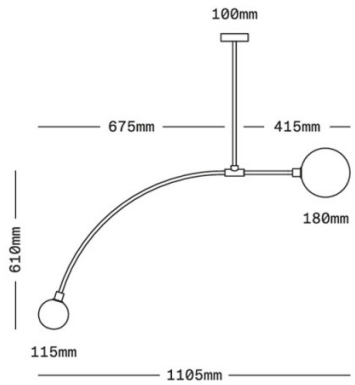

The SkLO Balance 1.0 Pendant is characterised by its strong, asymmetrical profile. The minimalist suspended light features two glass diffusers: a larger 18cm sphere and a smaller 11cm sphere, positioned on either side of its arched form. Each sphere is crafted from hand-blown Czech glass, available in both dipped and textured glass. The dipped glass features an open mouth, created by breaking the piece from the pipe during the blowing process. The textured glass features a soft, frosted finish and subtle lines etched into the glass. As each diffuser is handcrafted, natural variations will occur from piece to piece, adding character and ensuring every item is truly unique.

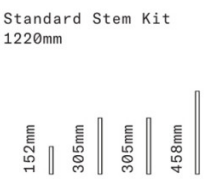

With a sculptural, curved silhouette, the Balance 1.0 Pendant adds a decorative element to interiors, suiting bedrooms, living areas, and dining rooms. In commercial spaces, this ornamental aesthetic suits hospitality settings such as restaurants and bars. When illuminated, light is diffused into a warm, soft glow that fills the surrounding space with a welcoming atmosphere. Display individually or in groups, staggered in height for a strong, sculptural display with a sense of movement.

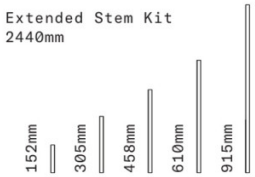

The Balance 1.0 Pendant includes SkLO's field-adjustable Standard Stem Kit. A field-adjustable Extended Stem Kit is available at an additional cost. See specifications for kit details. Please contact us for more information and pricing.

PRODUCT SPECIFICATION
