PRODUCT DESCRIPTION

Designer: Martín Azúa

Vibia Bind Solo 6678 LED Ceiling Spotlight

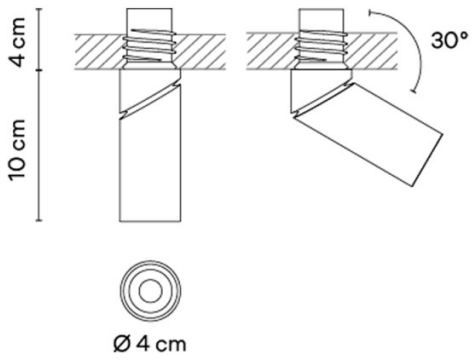

Designed by Martín Azúa, the Vibia Bind Solo 6678 LED Ceiling Spotlight is a compact, adjustable light with a cylindrical aluminium body. Its wide 52° beam provides directional illumination across a broader area than the narrower spotlights in the collection. The fitting has a neat ceiling connection, with the spotlight head extending below it, and comes in either Black or Beige M1.

The adjustable head makes the 6678 useful when the position of the light and the area you want to illuminate are not directly aligned. In a kitchen, it can be angled towards a worktop or a section of cabinetry. Along a hallway, several fittings could be positioned to light pictures or architectural features. The wider beam also works for lighting shelving and furniture in a living room, without concentrating all the light on one small point.

An integrated LED produces warm-white light at 3000K, and the supplied remote driver allows the fitting to be connected to the mains. This On/Off version is non-dimmable, so the brightness remains fixed. The spotlight can be adjusted during installation to set the direction of the light, and its appearance matches the other ceiling fittings in the Bind Solo collection. Most suited to kitchens, hallways, living rooms, and display lighting.
