BEGA Prima LED Wall Light

BEGA Prima LED Wall Light is a slim, linear wall fitting designed to provide soft, even illumination, particularly around bathroom mirrors. Its understated metal housing has a Velvet White finish, with a white translucent diffuser that distributes light across the length of the fitting. The narrow profile makes Prima suitable for residential bathrooms and commercial washrooms, where good visibility around a mirror is important.

The diffuser allows light to spread outwards rather than directing it into a narrow beam, making Prima useful for illuminating the face and surrounding mirror area. It can be installed vertically beside a mirror or horizontally above it, depending on the layout of the room. The warm white LED also has a high colour rendering index, helping colours and skin tones appear more natural when getting ready in the morning or evening.

Prima has an IP44 rating, making it suitable for bathroom environments where protection against splashing water is required. It uses an integrated, replaceable LED module and is finished in Velvet White, allowing it to sit alongside pale tiles, painted walls, and other bathroom fittings. The wider Prima collection includes other configurations and control options. Most suited to bathrooms, dressing areas, en suites, and commercial washrooms where soft, practical mirror lighting is required.

PRODUCT SPECIFICATION

Light Source:	6.5W, 3000K, 730 Lumens
IP Code:	44
Dimming:	Integrated on/off switch on the product.
Dimensions:	Height: 60cm Width: 6cm Depth: 5cm
