BEGA 50653.2 LED Ceiling / Wall Light

BEGA 50653.2 Ceiling and Wall Light is a circular interior fitting with a White Aluminium metal housing and hand-blown satin opal glass diffuser. The glass provides a soft, even spread of light, while the surrounding metal shield partly conceals its edges. This creates a contrast between the illuminated glass and the solid housing, giving the fitting a distinct appearance when switched on.

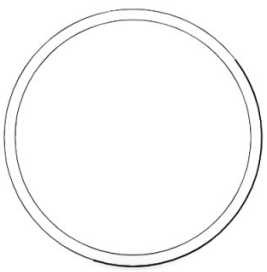

The 50653.2 can be mounted on a wall or ceiling, with its three-layer opal glass spreading light evenly around the room. The metal housing partly shields the sides of the glass, while some light reaches the surface behind the fitting. When wall-mounted, this creates a soft glow around its edges, adding to the light coming through the glass itself.

The fitting has an IP44 rating, making it suitable for bathrooms and other interiors where protection against splashing water is required. Its White Aluminium finish provides a subtle contrast against the satin glass, while the integrated warm white LED offers good colour rendering for everyday use. BEGA produces this family in several sizes and configurations, with the 50653.2 offering a compact circular option for domestic and commercial interiors. Most suited to bathrooms, hallways, bedrooms, living rooms, and other spaces where soft, diffused general lighting is preferred.

PRODUCT SPECIFICATION

Light Source: 18.5W, 3000K, 1587 Lumens
IP Code: 44
Dimming: Non-Dimmable.
Dimensions: Ø36cm
Depth: 8.5cm
