## PRODUCT DESCRIPTION

**Designer:** Alessandro Mendini

### Artemide Edge Wall / Ceiling Light

The Artemide Ege Ceiling/Wall Light is a minimalistic light fitting, designed to provide evenly dispersed diffused illumination. Crafted from a white thermoplastic material, Edge was designed by Alessandro Mendini for Artemide and is a playful creation for both wall and ceiling installations. At the same time, usability is further enhanced by how simple it is to change the light bulb: simply by unscrewing the diffuser from the base.

Available in two sizes, the Edge 21 and Edge 30, this lighting solution adds a sophisticated touch to your space, whilst the IP65 rating ensures it can be installed in interior, exterior and wet environments such as bathrooms and spas. The Artemide Edge light emits a soft and diffused glow, uniformly lighting the space around it, a stunning addition to hallways, entryways, bathrooms and kitchens.
