PRODUCT DESCRIPTION

Designer: Joan Gaspar

Marset Atlas Ceiling / Wall Light

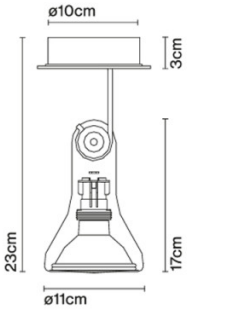

Marset Atlas Ceiling / Wall Light is a directional spotlight by Joan Gaspar, designed to turn a standard bulb shape into a more deliberate wall or ceiling fitting. The transparent polycarbonate shade follows the outline of the lamp, keeping the bulb visible while giving it a more finished form. The white polyamide canopy and stainless steel structure keep the rest of the fitting simple.

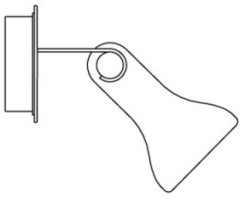

Atlas can be installed on the wall or ceiling, making it useful where a small adjustable light is needed without using a full track system. The spotlight can be directed towards a bedside area, artwork, shelving, a hallway, or a specific part of a room. It can also be used in more than one position across a space, with the transparent shade helping the fitting feel lighter than a solid spotlight.

Atlas is hardwired and supplied in a Transparent finish, with 2700K and 3000K versions available. The product is designed around the included E27 LED spot lamp, so the bulb sits within the diffuser rather than protruding beyond it. Most suited to bedrooms, hallways, living rooms, reading areas, display shelving, home offices, hotels, and interiors where a compact adjustable wall or ceiling light is needed.

PRODUCT SPECIFICATION

Light Source:	**2700K**: 1 x Max 9.5W PAR30S 25D 2700K (Included) **3000K**: 1 x Max 9.5W PAR30S 25D 3000K (Included)
