PRODUCT DESCRIPTION

Designer: Ramón Esteve

Link Modular Ceiling Light by Vibia

The Link ceiling light was designed by Ramón Esteve exclusively for Vibia. The Link is made up of several geometric lights, creating a stunning pattern on ceilings and providing an effective illumination. Each light features a diffuser to spread the light source, being efficient as a main light for interiors.

The Link modular ceiling lamp is made by the user, being customisable as the user can mix and match the different elements to create a masterpiece on the ceiling. The Link has seven elements to choose from that can be arranged in any way you wish, and each has a shallow enough height to be used in homes and on lower ceilings. Choose between different sizes and between a glossy white or glossy graphite finish to find the right configuration for your space.

The 5381, 5385, 5389 and 5396 elements are also available in a dimmable option. Please [contact us](#) for more information and prices.
