PRODUCT DESCRIPTION

Designer: Eric Sole

Artemide Mesmeri LED Wall Light

Artemide Mesmeri LED Wall Light has a sinuous and light ribbon geometry, with an aluminium body that conceals the source and keeps the fitting visually light on the wall. Designed by Eric Solè, it reflects the light primarily upwards but also downwards, opening up the beam into the room.

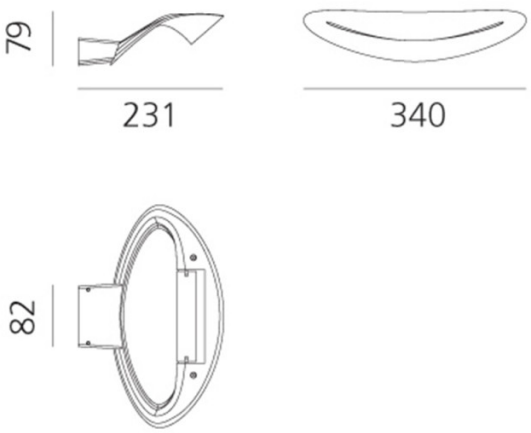

The indirect emission gives Mesmeri a softer character than a more exposed wall light, while the concealed source keeps the form clean and uninterrupted. In the 3000K version, the light reads as warm white, and the curved body continues to define the fitting even when it is switched off. The design was recognised with the 2006 iF Produkt Design Award, the 2006 Red Dot Design Award, and the 2007 Good Design Award.

Artemide Mesmeri LED Wall Light is available in White and Polished Chrome, with integrated LED and push dimming. Its compact wall-mounted form and upward-led beam make it useful in interiors that need light spread into the room without visual bulk. Best suited for hallways, bedrooms, living spaces, and other interior settings where indirect wall lighting is needed with a clean, sculptural profile.

Please note, this product is also available in a warmer 2700K version. Contact us for pricing and information.

PRODUCT SPECIFICATION

Light Source:	28W, 3000K, 2622 Lumens
IP Code:	20
Dimming:	Push to make/switch dimming, dimmable using push-to-make switches. Please consult your electrician; additional wiring may be required on-site.
Dimensions:	Width: 34cm Depth: 23.1cm Height: 7.9cm
