PRODUCT DESCRIPTION

Designer: Giulio Iacchetti

Foscarini Magneto LED Floor Lamp

An elegant design by Giulio Lacchetti, the Magneto LED Floor Lamp is an innovative and stylish luminaire that is designed around a magnet, allowing the user full mobility. The magnet sits between the lampshade and the stem so you can move it up and down and angle the light where you need it, making it an excellent directional task light. The integrated LED light source emits a strong flow of light perfect for a reading nook or next to a desk.

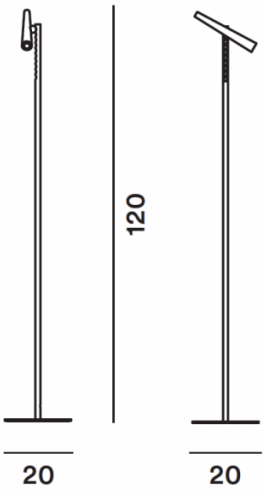

The Magneto LED Floor Lamp can be used in many settings due to its subtle white or black colour finishes and streamlined, modern design. Use in bedrooms, lounges, offices and more for a chic Italian touch in both homes and professional interiors, the minimalistic form allows this floor lamp to adapt seamlessly to a range of personal styles.
