FOSCARINI

Magneto LED Floor Lamp by Foscarini

The Magneto LED floor lamp is an innovative and stylish light that is designed around a magnet which allows for full mobility. The magnet sits between the lampshade and the stem so you can move it up and down and angle the light where you need. The integrated LED light source emits a strong flow of light perfect for a reading or task light.

The Magneto LED floor light can be used in many settings due to its subtle white or black colour finishes and streamlined, modern design. Use in bedrooms, lounges, offices and more for a chic Italian touch in both homes and professional interiors.
