PRODUCT DESCRIPTION

Designer: Ross Lovegrove

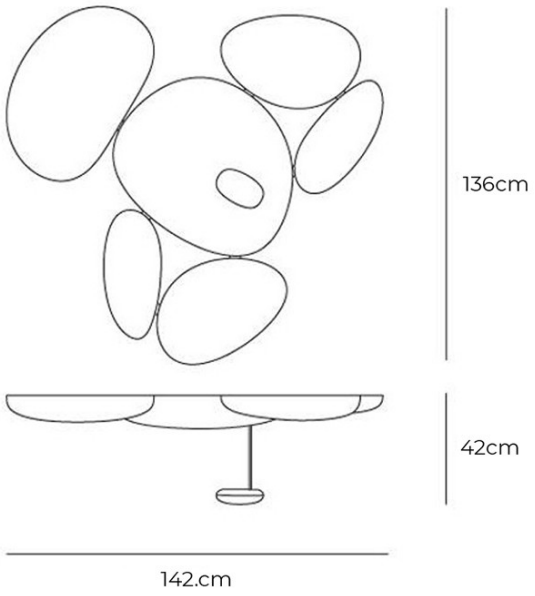

Artemide Skydro LED Ceiling Light

Designed by Ross Lovegrove, Skydro is instantly recognisable as his design. The ceiling light is comprised of numerous mirrored pebbles, each reflecting light and the nuances of its surroundings. The light is cast from the protruding pebble onto the larger ones that are 'sitting' on the ceiling. These modules are made of injection-moulded thermoplastic and have a metal finish. The Artemide Skydro is both a light and a sculpture, interchanging depending on the use; it instantly makes a statement even when not in use, as it absorbs energy from its surroundings.

The Artemide Skydro LED Ceiling Light can be customised, and you can supplement additional units and create your own pattern. Each installation can be unique and as big or small as you want. Skydro lights are ideal for large spaces, and for both residential use and hospitality, a contemporary addition to dining areas, entryways, hotels, restaurants, and bars.

PRODUCT SPECIFICATION

Light Source:	29W, 3000K, 1662 Lumens
IP Code:	20
Dimming:	Push to make/switch dimming, dimmable using push-to-make switches. Please consult your electrician; additional wiring may be required on-site.
