Arturo Alvarez Kite Ceiling/Wall

Made of curved shapes, allowed by the smooth material patented by Arturo Alvarez SIMETECH®, a composed material of stainless steel mesh and a silicone cover. The light weight material allows for the large size the Kite is available in.

As if floating in the sky on a windy day, the Kite is available in two sizes - small and medium. You can install a single Kite light or create your own composition. Just as a kite, the wall light fills the room with a warm and playful light.

Dimming: Dimmable via DALI/Push to make dimming systems. Please consult your electrician, additional wiring may be required on site.

Dimensions:

Small - 96 cm L, 88 cm W, 9 cm D

Medium - 135 cm L, 124 cm W, 9 cm D
