Marset Ledtube R LED Wall Light

Marset Ledtube R LED Wall Light is a compact reading wall light by Daniel López, developed as a headboard lamp for bedrooms and hotel rooms. The tubular light folds back into the circular wall plate when it is not in use, keeping the fitting neat beside the bed. Its injected aluminium structure and transparent polycarbonate frontal piece give it a precise, functional look, while the honeycomb grill helps reduce glare from the beam.

The light turns on automatically when the tube is opened and switches off again when it is closed. This makes it easy to use from bed, without searching for a separate switch on the wall. Ledtube R is available in left-hand and right-hand versions, allowing it to be specified on either side of a bed, and the movable tube lets the beam be directed towards a book, bedside area, or reading position.

Ledtube R is hardwired and available in Aluminium, Bronze, Matt White, and Matt Black finishes. The integrated LED gives warm 2700K light, with a focused beam designed for reading rather than general room lighting. Most suited to bedrooms, hotel rooms, guest rooms, headboard lighting, bedside reading areas, and contract interiors where a compact wall light needs to be simple to use and easy to fold away.

PRODUCT SPECIFICATION

Light Source: 4.25W, 2700K, 131 Lumens
IP Code: 20
Dimming: Integrated on/off switch on the product.
Dimensions: Ø13.2cm
Depth: 3.4cm
