FLOS

Kelvin LED Table Lamp Green Mode by Flos

The Kelvin table lamp by designers Antonio Citterio & Toan Nguyen delivers direct light, with a double pantograph arm and swivelling head. The body of the Kelvin is made from cast aluminium alloy, with outside of the head in die-cast aluminium with injection-moulded metalacrylate diffuser.

A truly contemporary design, the Kelvin table light with green mode is the perfect accompaniment to a work area or as a reading light. The dimmer switch on the head of the Kelvin has two modes: Personal Mode which allows the user to adjust light intensity as required and the new Green Mode which automatically adjusts the light intensity depending on surrounding ambience. When set in Green Mode the Kelvin LED switches off automatically, and only lights as the room darkens. The table lamp is available in four finishes, black, white, anthracite or chrome, and makes a perfect addition to any contemporary interior.

The Kelvin table lamp is supplied with a square base as seen in the images but is also available with a clamp or desk support. Please [contact us](#) for prices and details.

Designer: Antonio Citterio & Toan Nguyen

IP Code: 20

Dimming: Integrated dimmer on the product

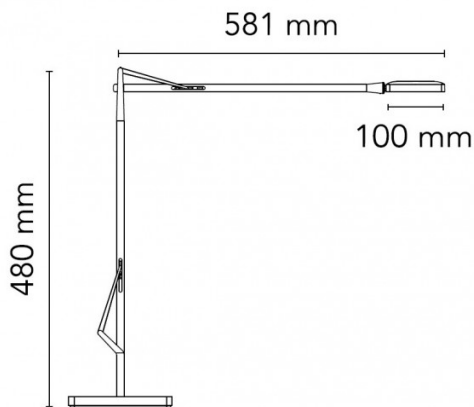

Dimensions:

48cm height

58.1cm length

10cm lamp head

180cm cable length
