PRODUCT DESCRIPTION

Designer: Karim Rashid

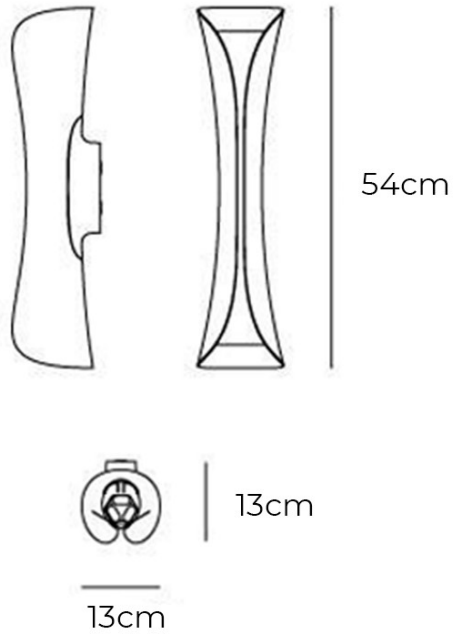

Artemide Cadmo Wall Light

The Artemide Cadmo Wall Light is a modern and minimalistic lighting solution and part of the **Cadmo collection**, designed by Karim Rashid. Made with an ABS panel that protects and emits an indirect and diffused light, this wall light takes two GU10 LED bulbs, and allows you to easily dim the illumination via mains phase dimming to personalise the ambience it creates.

The Cadmo Wall Light is available in a black/white or white finish, both of which can suit any contemporary interior and are guaranteed to make a statement. This design by Karim Rashid also won the iF Product Design Award in 2010. Display this unique wall luminaire independently, in multiples or alongside the **Cadmo Floor Lamp** to assemble a cohesive interior.
