PRODUCT DESCRIPTION

Designer: Ron Gilad

Goldman LED Table Lamp by Flos

The Goldman LED table lamp is a reinterpretation of the classic banker's desk lamp. With a minimal design, the table lamp is perfect for use as a desk lamp with an integral LED light source providing direct light. The Goldman table light is illuminated by a switch on the base and has soft touch dimming technology so the user can easily switch between decorative accent light and pronounced workspace lighting.

Designed with ease of use and functionality at its heart, the LED table light also includes built-in USB charger for your phone or tablet. The designer, Ron Gilad, combines a practical ingenuity with an aesthetic affect, which are placed on a boundary between the abstract and functional. This design belief creates beautiful and practical objects, and the Goldman desk lamp is no exception.
