PRODUCT DESCRIPTION

Designer: Ernesto Gismondi

Artemide Architectural Molla LED Exterior Wall Light

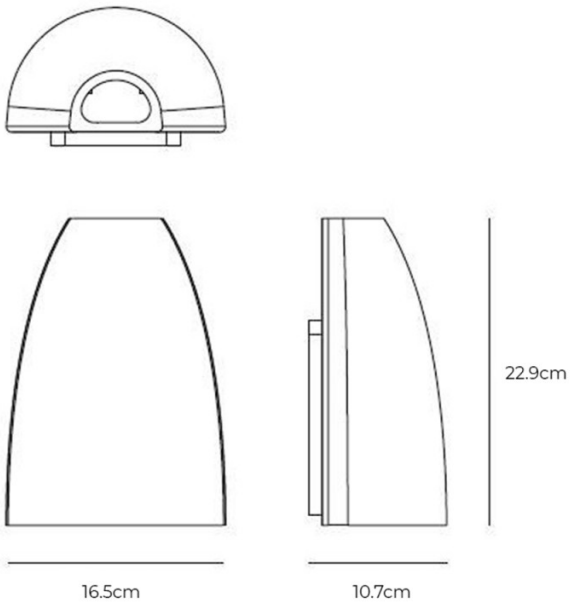

The Artemide Architectural Molla LED Exterior Wall Light is a compact outdoor fitting that combines two LED beams within a single minimal housing. A larger output delivers functional illumination for pathways, façades and circulation routes, while a narrower beam provides a decorative accent that adds depth and visual interest to the surrounding architecture. The fitting can be installed with the main beam directed upwards or downwards, allowing you to specify direct or indirect light depending on the mood and function required.

Rated to IP65 and supplied with an integrated electronic driver, Molla is built around a reinforced technopolymer body with die cast aluminium components and tempered, silk screened glass diffusers. The 3000K LED light source offers a warm white tone suited to both residential and hospitality schemes, with finishes in anthracite grey or grey white to sit comfortably against a range of façade materials. Molla is a practical choice where controlled, low glare lighting and a clean architectural appearance are equally important.

As the official UK distributor, we can support you with layouts, accessories and drivers. Contact us at artemide@davidvillagelighting.co.uk.

PRODUCT SPECIFICATION

Light Source:	12W, 3000K, 618 Lumens
IP Code:	65
Dimming:	Non-Dimmable.
