PRODUCT DESCRIPTION

Designer: Martín Azúa

Vibia Halo 2330 Circular LED Suspension Light

The Halo 2330 single pendant is part of the Vibia Halo collection, a range designed by Martín Azúa. The pendant lamp is a clever demonstration of how a light can appear weightless in mid-air, constructed of a PMMA round lampshade that produces an ethereal glow. The integrated LED light source sits inside the shade, seemingly disappearing for an innovative solution.

The Halo 2330 suspension has a singular shade that emits a welcoming and overall illumination, perfect for use as a central light in many settings. You can use it over tables, in lounges or use in big offices in multiple for an effective and useful light. The pendant light is also dimmable so you can create the atmosphere you want and can also be used alongside other lights from the Halo range for a consistent light scheme.

PRODUCT SPECIFICATION

Light Source:	23W, 3000K, 2086 Lumens
