Luceplan Hope Ceiling Light

Incredibly light and easy to assemble, the Hope Ceiling Light reinterprets traditional lamps with modern technologies and contemporary materials. The shade is curated from extremely thin Fresnel lenses, which reflect the light upon each other when turned on, giving it the appearance of a large sparkling diamond. The lenses optimise reflection and distribution of light, meaning you are not sacrificing functionality for a striking design and you can recreate the effect of glass, without the limitations. Unlike traditional glass or crystal fixtures the Fresnel lenses are much lighter and much less fragile.

This design emits a decorative lighting pattern and creates a sophisticated atmosphere in your home or public space. The Hope Ceiling Light is a great fit for environments with low ceilings as it takes up minimal space whilst still having a big impact - this light is a true statement piece and is guaranteed to become the centre of attention. Well suited for contemporary décor styles, this ceiling light offers an elegant ambience sprinkled with thousands of shards of light just like the diamond which inspired the name.

All lights in the Hope Collection will require assembly, assembly instructions included.

PRODUCT SPECIFICATION

Light Source:	3 x Max 42W HSGSA E14 (excluded)
IP Code:	20
Dimming:	Dimmable via mains phase dimming.
Dimensions:	Depth: 42cm Width: 69cm
