PRODUCT DESCRIPTION

Designer: Verner Panton

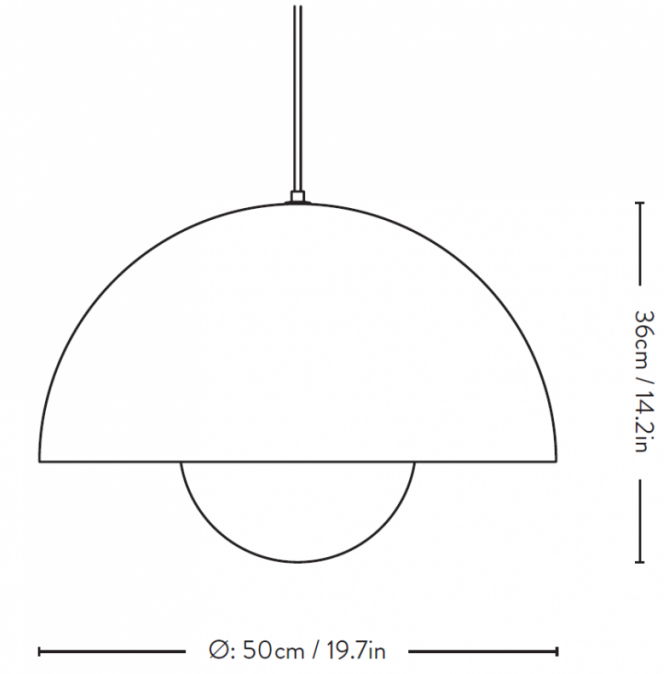

&Tradition Flowerpot VP2 Pendant

The VP2 Flowerpot Pendant was created by iconic designer Verner Panton. Panton often infused his designs with vibrant colour, believing that colours have a meaning and a function. Using bold colourways, Panton liked to encourage people to use their imagination and make their surroundings more exciting. The VP2 is a striking example of this philosophy. With a range of 10 colourways, the pendant is designed to add a splash of colour to any home.

The VP2 Pendant features an understated shade, comprised of two metal hemispheres. The lower shade is half the size of the upper shade. This ensures that the lower shade conceals the light source from view for glare-free, diffused lighting. When illuminated, light is reflected from the shade, offering a soft and ambient glow. Display in a dining room, kitchen, or living area to create a welcoming atmosphere that brings personality and playfulness to the room. Display individually or with other pieces from the **Flowerpot Collection** for a bold addition to residential or commercial spaces.
