PRODUCT DESCRIPTION

Designer: Neil Poulton

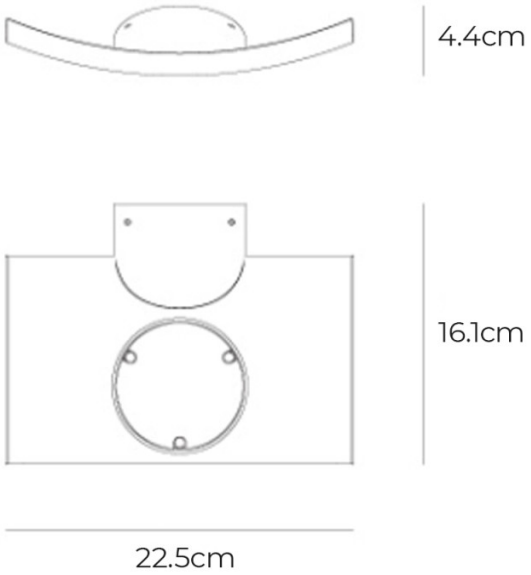

Artemide Microsurf LED Wall Light

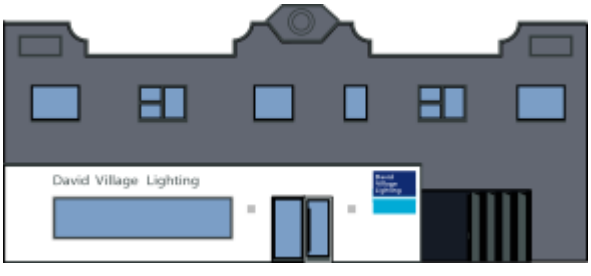

The Artemide Microsurf LED Wall Light is a stripped-back lighting solution, crafted from aluminium with a sleek white finish. Originally released with a halogen light source, the new and improved model embraces LED technology, thus enhancing its design even more. The LED light source is projected upwards towards the wall, generating an indirect illumination that also prioritises visual comfort.

The Microsurf Wall Light was designed by Neil Poulton, who is best known for technology-based products, and has become a signature piece that can adapt to a variety of environments. A functional addition to hallways, kitchens, entryways and dining areas in residential homes, Microsurf can be used independently or in multiples. Similarly, it can also be utilised in commercial spaces, especially in hotels, restaurants and bars.
