PRODUCT DESCRIPTION

Designer: Naoto Fukasawa

Artemide Demetra LED Table Lamp

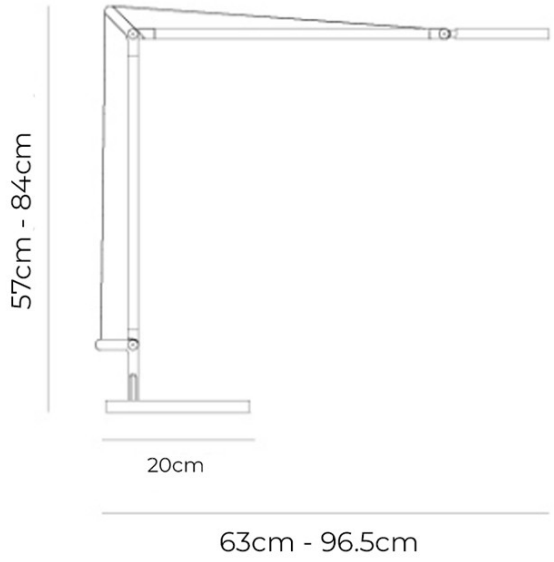

The iconic and original-sized Artemide Demetra Table Lamp was designed by Naoto Fukasawa. Fukasawa's design is a way to promote a simple and homogeneous harmony between an object and its user. His concept of 'Outline' is easily depicted on the Demetra lights, with a streamlined design.

The Demetra desk lamp offers a wide range of movement, with a flexible head/diffuser and adjustable arm. The diffuser can be tilted and rotated, granting you ease of use and direct the light in various positions. The arm can be tilted up to 45°, while the head allows for more movement on both the vertical and horizontal axes. An integrated dimmer switch, located atop the diffuser, ensures you can effortlessly control light intensity.

The Demetra table light is also available with a **motion sensor**, which detects movement activity and switches itself off after 12 minutes. The **Demetra Collection**, contains a large range of lights, floor and table lamps, wall lights and spotlights. Fukasawa boosted the collection with the addition of the **Demetra Professional** task lights, which provide maximum performance and the highest illuminance.

PRODUCT SPECIFICATION

Light Source:	8W, 3000K, 385 Lumens
IP Code:	20
Dimming:	Integrated dimmer on the product.
Dimensions:	Height: 57cm - 84cm Depth: 63cm - 96.5cm Base: Ø20cm
