PRODUCT DESCRIPTION

Designer: Naoto Fukasawa

Artemide Demetra LED Wall Light

The Artemide Demetra Wall Light was designed by Naoto Fukasawa who follows the 'Outline' concept, focusing on a simple and harmonious design with a streamlined designer light. The Demetra design won numerous awards, like the Red Dot Design Award Essen, the iF Design Award Deutschland and the Design Plus, light + building Frankfurt am Main in 2004.

The Demetra wall light, with a minimalist and streamlined design, provides a wide range of movements and flexibility. The head can be rotated along the vertical and horizontal axes, while the arm can be tilted up to 45°. The light intensity is controlled by an integrated dimmer switch, located on the top surface of the head. The wall light is available in 3 colour options: anthracite grey, opaque black and white.

As part of the collection, the Demetra wall light is also available with a **motion sensor**. The light detects movement absence and will automatically switch itself off after 12 minutes of inactivity. The extensive **Demetra Collection** of table and desk lamps, wall lights, spotlights and floor lamps offers the same flexibility and movement, all compacted into a sleek and various interactive features. The family is complemented with the addition of a series of task lights, **Demetra Professional**, with an optical device that is more complex and has a more powerful LED source.

Please note: this product comes with a cable and plug and which needs to be plugged into a nearby power socket. This product cannot be hard-wired.

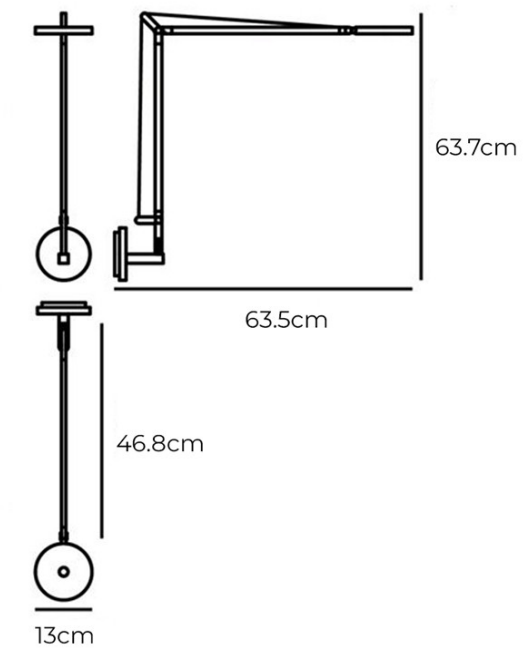

PRODUCT SPECIFICATION

Light Source: 8W, 3000K, 385 Lumens

IP Code: 20

Dimming: Integrated dimmer included on the product.

Dimensions: Head: Ø13cm
Depth: 63.5cm
Height: 63.7cm
