PRODUCT DESCRIPTION

Designer: Naoto Fukasawa

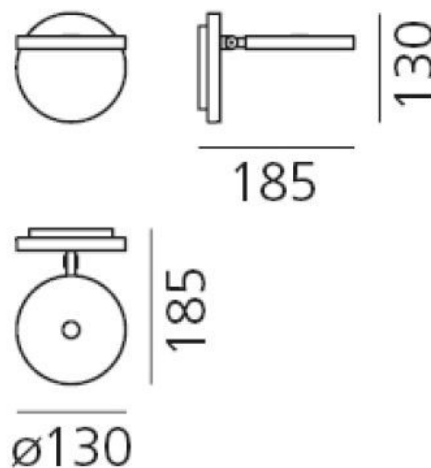

Demetra LED Spotlight by Artemide

The Demetra LED spotlight is part of the [Artemide Demetra Collection](#), designed by the renowned Naoto Fukasawa exclusively for Artemide lighting. The spot light is distinguished by its functionality and flexibility; although a minimalist design the lights are everyone's first choice for both residential and commercial spaces. This light houses an integrated LED source which is highly efficient and eco-friendly. The diffuser is also rotatable and can tilt, allowing you to direct the light in any direction, instantly changing the room's mood.

The Demetra spotlight is available in both a non-dimmable version which you hard wire into the mains or as a dimmable version with a switch on the product. You can also choose between 3 finishes to match the light to your design scheme. The perfect light for your bedside or room, the Demetra light was inspired by the Greek Goddess of harvest, with Fukasawa aiming to bring a creative environment into any domestic or commercial interior.
