PRODUCT DESCRIPTION

Designer: Morten Voss

Aeon Rocket Pendant Light by Fritz Hansen

Designed in 2012 by Morten Voss, the Aeon Rocket pendant light is characterised by the combination of metal and plastic, working harmoniously to produce a stylish and eye-catching light. The top shade is made from either aluminium or steel and the bottom is made from recyclable polypropylene. The plastic is woven into 98 (P1) or 100 (P3) openings, allowing the light to escape wonderfully.

The lower shade also diffuses the light, producing a warm glow that will illuminate the room. The Aeon Rocket pendant is available in 2 sizes the smaller P1 and the bigger P3 so you can find the right size for your room. You can mix and match sizes and colours to create variety or buy one for a feature light. This pendant light is perfect for office and home environments and a wide variety of interiors, including lounges, kitchens and dining rooms.
