PRODUCT DESCRIPTION

Designer: Omer Arbel

Bocci 14.1 Pendant Light

The Bocci 14.1 Pendant is a low-voltage light that is made from a beautiful blown borosilicate glass sphere, designed by Omer Arbel. The inside of the sphere has a frosted cylinder which houses the light bulb, creating a warm glow that is effective and fascinating. The pendant light comes with a choice of two bulbs, either a **Xenon 10W** or an **LED 1W** bulb, which is included by Bocci. These light sources mean the pendant is energy-saving and long-lasting, and you can buy replacement bulbs from Bocci so you can keep your pendant lamp for life.

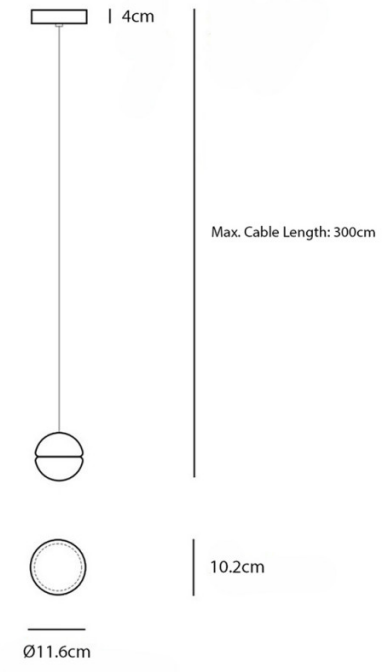

The **Xenon 10W is dimmable** and the **LED 1.5W is non-dimmable**, so you can choose the right version for your needs. The 14.1 Pendant Light is suitable for smaller spaces, being a subtle light that has a stylish and chic look, wonderful in homes and professional settings. The light also comes with an adjustable cable so you can find the right length for your interior. The 14.1 Pendant Light is also available in various clusters and combinations as part of the **Bocci 14 Series**, perfect for larger spaces.

Please note, the Bocci 14.1 Pendant is supplied with a deep white ceiling canopy as standard.

Shallow and flush mini canopy options, along with the Mirror 1 glass finish, are also available. For further information and pricing, please contact us.
