PRODUCT DESCRIPTION

Designer: Inga Sempé

Luceplan Ecran In/Out LED Wall Light

Designed by Inga Sempe in 2011, the Ecran In/Out LED Wall Light is suitable for both indoor and outdoor use. Made from waterproof polycarbonate and a diffuser that covers the light from top to bottom, the Ecran is protected against all weather conditions. This light has no visible wires and presents the illusion that it is floating in mid air, while emitting a soft warm light that can be directed upwards, downwards or to the side, depending on how you decide to display it.

The screen produces an especially warm light, while the embedded LED lamps are an energy efficient and durable light source, guaranteeing a long life span. The light emitted creates an atmospheric ambience, whether in the kitchen, living area or bedroom or used to illuminate the garden. Multiple Ecran LED Wall Lights can also be combined together to create a small feature in your home or public space for a more dramatic display.
