### PRODUCT DESCRIPTION

**Designer:** Victor Carrasco

### Vibia 45 Degrees LED Ceiling Light

The 45 Degrees LED Ceiling Lights were designed by Victor Carrasco exclusively for Vibia and are a testament to modern and refined design. Each ceiling lamp is made from aluminium and finished in either black, white or black oxide for a minimalist look. The 45-degree lighting solutions feature an integrated LED light source which emits an effective downward accent light, perfect for installing over tables or workspace surfaces.

The 45 Degrees Ceiling Light is available in three sizes (8250, the 8251 and the 8252) with each one increasing in height. You can mix and match the sizes and colour finishes of the 45-degree collection to create a variety of uses, or you can stick to just one colour and size for a more uniform aesthetic. Each ceiling light also comes with two diffusers, in off-white and orange, which are interchangeable so you can personalise your light installation and alter the warmth of the illumination.

### PRODUCT SPECIFICATION
