### PRODUCT DESCRIPTION

**Designer:** Ramos & Bassols

### Vibia Domo Slanted Ceiling LED Light

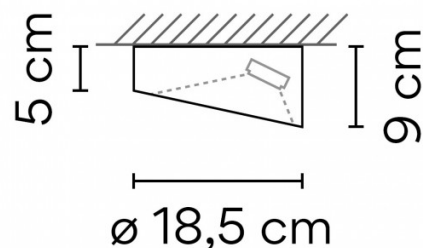

The Vibia Domo LED Slanted Ceiling light was designed by Ramon & Bassols, who wanted to produce a contemporary ceiling light that creates a spotlight effect. This light features a slanted silhouette and curved lines, having a simple aesthetic and optimum function to easily install on the ceiling. Thanks to the slanted effect of the diffuser, Domo's lighting output can be directed towards the wall to highlight key features in your decor or to create interesting lighting patterns in your home.

Available in an elegant white finish, Domo can easily adapt to any contemporary setting and design scheme and is perfect for use in corridors and for highlighting certain interior features. Use in multiple for effective illumination or use alone in smaller areas for a more concentrated glow.
