PRODUCT DESCRIPTION

Designer: Josep Lluis Xucla

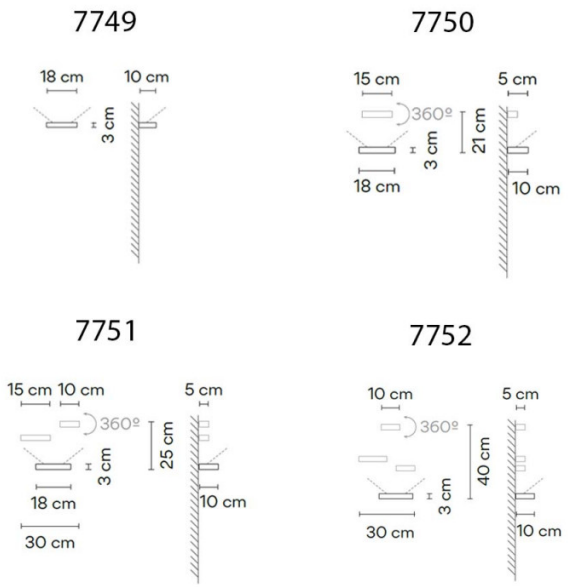

Vibia Set - Small LED Wall Lights

Vibia Set LED Lights were designed by Josep Lluis Xucla and create a beautiful play of light against your wall, the Set collection transforms into a surface wall lamp, creating a perfect decorative purpose. Originally, the Vibia Set LED Wall Lights were designed to be garden lamps, emitting the same reflective effect, but Xucla soon realised that the garden light produced too much glare. Xucla began to experiment with different solutions, during this time he attempted to attach the Set to the wall; surprisingly he discovered that this solved his issue, and once the light source was displayed above eye level the glare disappeared.

The Vibia Set is highly personable, although the bottom diffuser remains fixed and cannot be adjusted, the other elements can be moved around your wall however you wish. You can craft sharp and bold shadows or spread the elements out for a softer and playful effect. For the compositions with multiple components, the LED light source is fitted within the bottom element, whilst the above elements can be manoeuvred to create varying shadow effects or patterns in your space.

PRODUCT SPECIFICATION

Light Source:	9W, 2700K, 1269 Lumens
IP Code:	20
