PRODUCT DESCRIPTION

Designer: Josep Lluís Xucla

Vibia Set - Large LED Wall Lights

Designed by Josep Lluís Xucla, the Vibia Large Set LED Wall Lights are perfect for more spacious homes and commercial spaces. The compositions consist of adjustable parts that generate and reflect light on the walls, while also acting as a decorative element. The Vibia Set boasts a base diffuser sitting at the bottom of the composition, whilst the other elements can be moved around your wall however you wish. This means not only the physical elements can be adjusted but you can also personalise the shadows created by the LED light source. Whether positioned on the wall of a bedroom, hallway, entrance hall or hotel it plays an excellent lighting and decorative purpose. Vibia Large Set can be displayed individually as a minimalistic but functional wall light or is available in clusters for a more dramatic composition.

Originally, Set was supposed to be an exterior light; boasting one lit element and several non-lit elements, which work as reflectors. Xucla discovered a problem when he discovered how much glare the finished product emitted. Xucla attempted mounting the lights on the wall, and discovered that the glare was removed when the light source rested above eye level - and so the Vibia Set was created.

PRODUCT SPECIFICATION

Light Source: 9W, 2700K, 1269 Lumens
IP Code: 20
Dimming: Dimmable via 0-10V dimming systems. Please consult your electrician, additional wiring may be required on site.
