PRODUCT DESCRIPTION

Designer: Jordi Vilardell

Vibia Suite 6050 Wall Light

The Vibia Suite 6050 LED Wall Light provides your room with a soft accent illumination, filtered through a glass diffuser and projected evenly across the space. This design is courtesy of Jordi Vilardell, who aimed to create lighting solutions that can be utilised in living areas of the home, adjacent to a sofa or by the bed. The discreet silhouette can be displayed on its own or grouped together in multitudes to brighten up larger interiors. The sleek white finish means it can easily blend into a range of spaces and can suit a wide range of personal styles.

The organically shaped glass diffuser of the Vibia Suite is set away from the wall with a metal mount, allowing the illumination to be emitted both outwards and inwards, it reflects off of the wall and is projected back towards the centre of the room. The Suite 6050 LED Wall Light makes a perfect bedside lamp or reading light, expertly able to soothe you into a place of relaxation.
