PRODUCT DESCRIPTION

Designer: Ramón Esteve

Vibia Origami LED Outdoor Wall Light

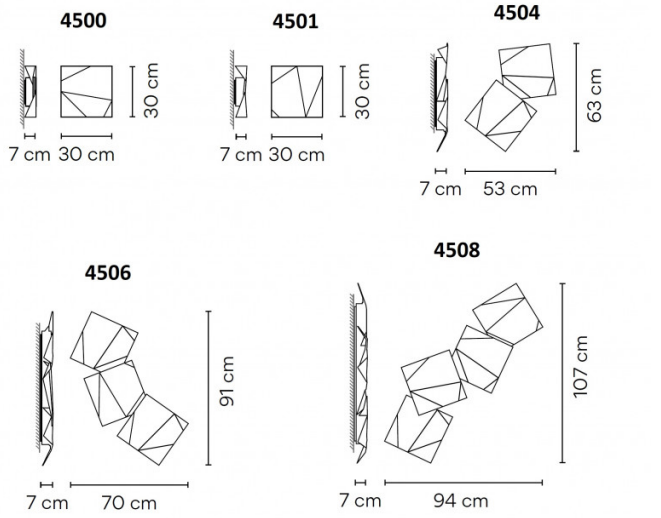

The Origami wall light was designed by Ramón Esteve, who was inspired by Japanese paper folding art. He creates the look of folded paper with cube-shaped lampshades which are textural and geometric. The effect produces a 3D aspect on any wall, creating an innovative and contemporary look in any interior.

The Origami wall lamp is a modular compositional light where you can choose between different sizes and shapes to configure your personalised display. The wall light can be used both inside and outside and produces an ambient glow that surrounds each cube for an atmospheric look. A truly creative piece, the Origami will look stunning and will draw the eye in any space. Available in a white, brown, green or dark terra colour finish.

A maximum of 30 modules can be connected to a single connection point. For bigger compositions, check the connection system.
