Amphora 01 Floor Lamp by Bover

The Amphora 01 floor lamp provides illumination and decoration for both exteriors and interiors, being versatile and stylish for any space. The shade is made from a synthetic fibre and is held by a metal tripod having a natural and rounded shape. The inner diffuser conceals the light bulb, sitting in the bottom of the light shade to emanate outward and upward. The design creates a gorgeous aesthetic, resembling the natural world as the light source evokes images of a pearl sat in an oyster.

The Amphora 01 floor light can be used to create a warm atmosphere and a stunning visual effect. The floor lamp is available with either a light beige or rattan brown shade, having a tight weaved pattern that is soft and alluring. Use in any space in both commercial and domestic settings.
